Project Demonstration Plan

Suggested walkthrough for the three dashboard scenarios

Student	Hussain Hattpipliya Wala
Institution	MEDI-CAPS University
Programme	Bachelor of Computer Applications (BCA)
Year / Semester	Second Year / Third Semester
Project	Global Olympic Sports Performance Analysis
Analytics tool	Tableau Public

Demo objective

Show how the three Tableau dashboards answer different but connected questions about Olympic performance. Keep the demonstration focused on the live visuals, metric interpretation and responsible use of data.

Recommended walkthrough

• 1. Introduce the project, its purpose and the four supplied CSV files.

• 2. Open Scenario 1 — NOC Performance. Explain medal totals, category comparison and participation views.

• 3. Open Scenario 2 — Financial & Strategic Planning. Explain investment-efficiency, regional allocation, host status and human-capital views.

• 4. Open Scenario 3 — Talent Analytics. Explain Games trend, host-country comparisons and regional distribution.

• 5. Demonstrate filters or tooltips that are actually available in the live views.

• 6. State one insight from the displayed data and one limitation.

• 7. Close with the project structure and future improvements.

Presenter reminders

• Do not describe a correlation as a cause.

• Do not claim a dashboard feature works unless demonstrated.

- Distinguish medal totals, medal points and medal efficiency.
- Keep the data provenance caveat visible.
