Communication & Team Involvement

Project communication and ownership

Student	Hussain Hattpipliya Wala
Institution	MEDI-CAPS University
Programme	Bachelor of Computer Applications (BCA)
Year / Semester	Second Year / Third Semester
Project	Global Olympic Sports Performance Analysis
Analytics tool	Tableau Public

Project owner

Hussain Hattpipliya Wala — BCA, Second Year / Third Semester, MEDI-CAPS University.

Communication principles

• Use plain-language titles and define NOC as National Olympic Committee.

• Explain what each chart measures before interpreting it.

• Use the same region names and colour meanings consistently.

• State when a finding comes from the supplied dataset rather than an independently verified official source.

Suggested presentation sequence

Project objective → data inventory → Scenario 1 NOC Performance → Scenario 2 Financial & Strategic Planning → Scenario 3 Talent Analytics → limitations → future work.

Team involvement note

The supplied project details identify Hussain as the student owner. No additional team-member names or assigned roles were provided, so this document does not invent team members. If this is a solo project, present it as an individual project; if collaborators contributed, add their verified names and responsibilities.

Feedback capture

Record reviewer question, dashboard/scenario, observed issue, suggested change, priority, owner and resolution. Do not claim feedback sessions occurred unless there is evidence.
